

DELEGACION DE EMPRESAS Y ENTIDADES CANADIENSES EN CANARIAS

DE INTERÉS, CANADÁ: REUNIONES PRIVADAS CON EMPRESAS CANADIENSES PROVEEDORAS DE LA MINERÍA

Fecha: 17 de junio; Lugar: Casa África

OPCIÓN A:

Interés en ser proveedor logístico / distribuidor para empresas canadienses

EMPRESAS PROVEEDORAS DEL SECTOR MINERO (4)

(1) Mansour Mining Technologies Inc. is a market-leading manufacturer of integrated mining supply products, including ground support, rock-drilling tools, mine ventilation, and smelter and refinery hardware. Mansour Mining Technologies Inc. offers these integral products in order to keep mining operations safe, efficient and profitable. Innovation, quality and around-the-clock global service represent the core values that encompass Mansour Mining Technologies Inc. After 40 years in the mining industry, Mansour Mining Technologies Inc. understands that the key to success is to develop close working relationships with customers. Mansour Mining Technologies Inc. builds these customer relationships from the ground down.

Participant: **Justin Laderoute**

Interest: - Engineering Companies - Partners - Distributors - Medical Emergency

(2) Since 1975, **Phoenix Geophysics** has provided instrumentation and services to clients in more than 75 countries and has carried out surveys for many of the world's largest mining companies. Phoenix specializes in broadband magnetotellurics (MT/AMT/BMT) and other electromagnetic techniques, which identify subsurface anomalies that can signal the presence of metals and diamond-bearing kimberlites. High-sensitivity phase IP was instrumental in mapping anomalies associated with the Hemlo gold ore body in the 1980s. Recent Phoenix surveys detected ore bodies deeper than 1,000 meters, at cost no greater than for shallow investigations. The Phoenix line of transmitters provides users with flexible current-source solutions

and a range of power outputs. Phoenix's time-domain and frequency-domain transmitter, the TXU-30, is a reliable, stable, high-power-output EM solution, delivering up to 40 amperes in loops of square-kilometer area. It is a proven success in Canada and other countries.

Participant: **Leo Fox (President) & Audrey Fox**

Interest: - Engineering Companies - Partners - Distributors - Medical Emergency

(3) Solmax is positioned among the top leaders in the manufacturing of PE geomembranes and offers both containment and fluid transportation solutions, including HDPE pipes, valves, fittings and accessories. Manufactured in Canada, Malaysia and Chile, its products are sold worldwide and are used by the biggest names in the mining, petroleum, waste management, water and civil engineering sectors. Solmax products are vital in protecting soils from contamination in applications as critical as the landfills of the world's most populated cities to the mines operating in environmentally fragile ecosystems. Its vision: Covering the world. Protecting the Earth.

Participant: **Paul Roux**

Interest: - Engineering Companies - Partners - Distributors - Medical Emergency

(4) CYPHER ENVIRONMENTAL, **Cypher Environmental** is a leading provider of global environmental solutions for **dust control, erosion control, soil stabilization, and wastewater and effluent treatment**. Cypher has the proven solutions in the form of highly advanced products to ensure environmental integrity and superior quality – all of our products are 100% environmentally-friendly, organic, bio-degradable, and non-toxic. Our products are sold in highly concentrated powder forms which increases shelf life and significantly reduces shipping costs.

OPCIÓN B:

Interés en informarme sobre mi potencial exportador a través de la *Canadian Association of Mining Equipment and Services for Export (CAMESE)*

The **Canadian Association of Mining Equipment and Services for Export (CAMESE)** is the national voice for Canada's mining equipment and service providers, delivering effective and efficient services to assist members in growing their business. CAMESE's approximately 300 corporate members across the country supply the entire mining industry spectrum, from mineral exploration, mine development and refining to reclamation and closure. The experienced team at CAMESE supports members in identifying business opportunities by providing key marketing intelligence, advice, networking events and a comprehensive international marketing program. CAMESE amplifies marketing efforts by placing member profiles and news on its website and member profiles in its *Compendium*. CAMESE is also a key conduit for brokers and end users searching for reliable Canadian sources of all types of goods and services used in the mining industry. Contact CAMESE or visit the website for more information about the ways in which CAMESE helps grow your business.
